

UNIQUE DOG PRODUCTS

ZONAS TAPE

For dogs' ears, we sell Zonas Tape which is paper cloth base and not cloth, 2.5 cm wide x 9.1 metres long, retails for only 4.99 each roll, and are sold by the roll. We had been selling this to hundreds of breeders in the past 25 years. They usually also get a liquid solvent called "Tape Remover", not for removing the tape but to enhance the stickiness. Interestingly a drop or more of this Tape Remover enhances the stickiness, and much more of it will help remove the tape when the tape is due to come off. Many breeders had told me that Zonas tape works even better because it is lighter and yet sturdy enough to hold the splint. With the help of the Tape Remover, nobody was unhappy with the stickiness.

(Not all of our products are listed on our on-line store. These specialty items are ordered by email or by phone and we ship them out.)

TAPE REMOVER

A little bit of this can be used in fact to enhance the stickiness of any tape. And of course it makes the job of removing tape a lot easier

TATOO KIT, LETTERS, INK LIQUID, INK PASTE
